Quick recovery from a short treatment

- You may experience a little discomfort after the treatment, but this should subside quickly\(^1\)
- Patients can expect some bruising and swelling, which may last up to a week\(^2\)
- Unlike traditional surgery, there is no need to wear a head bandage after the treatment\(^2\)
- Your physician may prescribe a few days of antibiotics to reduce the risk of post-operative wound infection\(^2\)

Real, customised results with earFold™

Talk to your physician

For the correction of prominent ears - a simple and customised treatment with predictable results\(^1\)

- An in-clinic treatment that takes around 20 minutes\(^1,2,*\)
- Minimally invasive - under local anaesthetic\(^1,2\)
- Predictable outcome that is permanent and reversible, if necessary\(^1,2\)

*Depending on the number of implants required. Does not include assessment, consent, dressing, and discharge paperwork.

What are prominent ears?

Prominent ears is a term used when ears stick out from your head more than you would like. Prominent or protruding ears are thought to affect approximately 1-2% of the population, which is about 100 million people worldwide.3

Fortunately, there is a way to get the ears you have always wanted.

Introducing earFold™

A simple and effective treatment option for the correction of prominent ears.1

A customised, minimally invasive, in-clinic* treatment1,2

Schedule a preFold™ assessment with your physician
- Gives you control over your aesthetic outcome4
- Involves your physician putting preFold™ positioner on the outside of your ear4
- Allows you to fold your ears back a little, or a lot, depending on your preference4
- If you and your physician agree, you will proceed to earFold™ treatment

earFold™ treatment
- Your physician will place earFold™, the permanent implant, underneath your skin in the exact position determined in your assessment6
- The treatment will take around 20 minutes1,**
- earFold™ requires only a small incision under local anaesthesia, and a few small stitches that do not need to be removed2

earFold™ is designed to treat both adults and children as young as 7 years of age for the correction of prominent ears.2

* Performed under sterile conditions.
** Depending on the number of implants required. Does not include assessment, consent, dressing, and discharge paperwork.
